- Created sites using Divi in Wordpress.
- Created email design/UIs using Foundation Zurb for clients.
- Optimized applications for speed, scalability using Google Developer Tools and Lighthouse.

PERSONAL PROJECTS

Display NFT's from Web3 Ethereal Wallet Address

Project which consists of NextJs, and using Alchemy's API to integrate with wallet, after entering the address shows the NFT's from that wallet.

Flower Game

This project is built in VueJS. This is the game in VueJS where I fundamentally had to learn VueJS from scratch as this was the first major app I worked on.
