PROJECTS

Display NFT's from web3, Ethereum wallet address

Project which consists of NextJs, and using Alchemy's API to integrate with wallet, after entering the address shows the NFT's from that wallet.

Flower Game

This project is built in VueJS. This is the game in VueJS where I fundamentally had to learn VueJS from scratch as this was the first major app I worked on.

ACHIEVEMENTS

I was awarded a full scholarship to study at University Of Sussex and was chosen to be 1 in 25 students from nearly 10,000 applicants.

EMPLOYMENT & EXPERIENCE

UI Engineer

Edge & Node (Graph protocol) (02/2022 - 11/2022)

Worked in NextJs, React, ThemeUI and shipped many marketing pages and UI's in tight deadlines. Worked on creating a design system and developed components using storybook in NextJS. Collaborated with colleagues on a complex project to organize resources and enable the delivery of a project on time.
Refactored and optimized existing code.
Optimised performance of the websites.

Software Developer Intern

APY Vision (04/2021 - 12/2021)

Successfully created UI's and features with React such as I shipped marketing site.
Tested sites and applications in different browsers and environments before implementation to ensure deliverable.
Problem solving and bug fixes in existing projects.
Built features using different protocols, and chains and created layouts.

Founder, Full-Stack Developer

Rooots, Moziilla Builders Spring Open Lab(04/2020 - 01/2021)

Founded women mentorship platform, lead the team on a complex project to organize the project and enable the delivery of a project on time as part of Mozilla's program.
Started developing the site using VueJS & NodeJS.

Front-End Developer

Joyjet Digital Space Agency (09/2019 - 03/2020)

Developed new user-facing features in languages such as HTML5, CSS and JavaScript, created sites using Divi in Wordpress.
Learned and worked on creating email designs using Foundation Zurb for clients.
Built reusable code in React while ensuring the technical feasibility of UI/UX designs,
Optimizing applications for speed, scalability using Google Developer Tools and Lighthouse.
Used Git extensively.
